

## Does the Sharper Minds® Program Work?

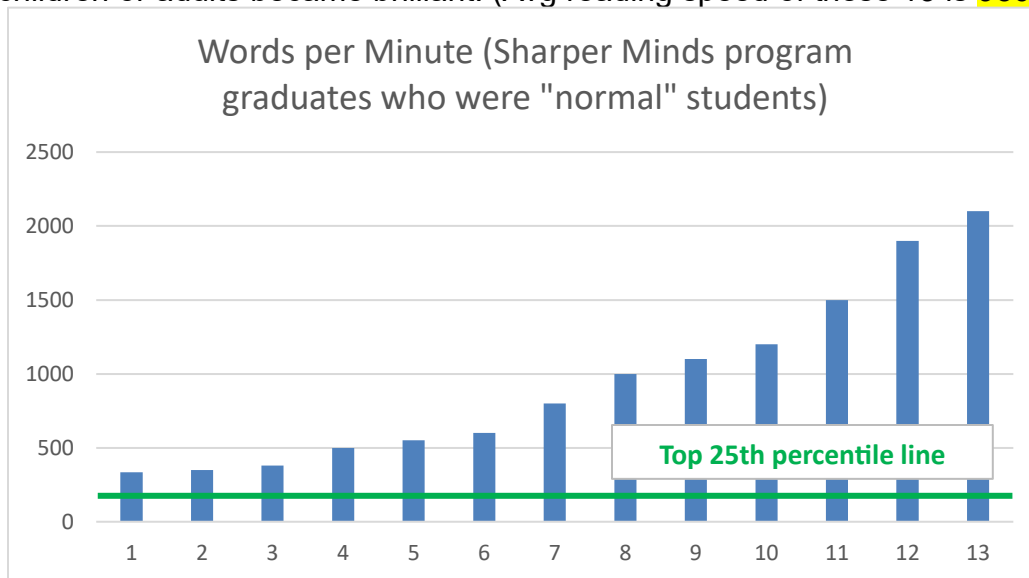

As a parent of a child who may have dyslexia, ADHD, autism, head trauma, childhood stroke or a brain tumor, you know of the intense struggle that you and your child face. Where do you turn to for therapy that really works?

In September of 2023, Sharper Minds did a study of our 29 most recent program graduates, 16 with processing disorders and 13 “normal” students.

The first graph shows the reading speed (with good comprehension) results of the 16 students who had fairly severe cognitive issues such as severe dyslexia, ADHD, a brain tumor in the visual cortex, etc. **Compare the red and green lines vs. the results.** The average speed result of these 16 is **499 wpm**, much **Better than Normal! Think Better – Live Better!**

“Normal” children or adults became brilliant! (Avg reading speed of these 13 is **950 wpm**)

Note that 8 of the 29 students (~27%) were reading 1000+ wpm! 51% were reading 500+ wpm. The affordable Sharper Minds program has been proven with over 700 families and 2000 students since 1999. **Call 1-866-HELP-A.D.D. (435-7233) to discuss YOUR situation** and see if the Sharper Minds program is the right fit for your family. Please leave a message if voicemail should pick up. **Sharper Minds – Your solution**
